SafePath continues to prioritize the safety and health of our clients, MDT members and employees. We have been monitoring information from medical professionals and the CDC as to the Coronavirus (COVID-19) situation that has evolved over the past four months.

Prior to reopening the center on June 15th, we put in place numerous precautions. We are completing several levels of screenings for both staff and clients. This includes screening questions (related to out of state travel, COVID diagnoses or exposure to those with COVID and symptoms) and taking of temperatures before entering the center. We are providing masks to everyone entering the center and encouraging them to use hand sanitizer often. Rooms that are being used for direct services are sanitized frequently throughout the day.

Thank you for your understanding and support in our attempts to protect the wellness of our clients, staff and MDT members. We remain committed to doing our part as an organization serving children and families during this time.

Ensuring the health, safety and well-being of the children, families, MDT members and community members we serve, has always been a top priority, and is especially critical at this time.
